remarka

This grow Schedule is designed for use with BIOBIZZ products. These basic directives will show you step by step how to get the most from your products and the best from your plants.

Buzz Off

BIOBIZZ advise to treat all the plants with **BuzzOff**, (an anti-insect concentrate), during the growing phase. Dilute 1 to 2 ml of the concentrate with 1 litre of water and spray this on the plant.

Fish-Mix

Fish-Mix can be used instead of **Bio-Grow**. **Fish-Mix** can also be used in combination with **Bio-Grow**. In this case use half of the dose for both products indicated in the grow-diagram.
