

There is a Dyna-Gro Formula For Every Growing Need

No matter what type of plants you are growing, Dyna-Gro has The Nutrition Solution for you.

African Violets / Blooming Houseplants

Liquid Grow 7-9-5 is the general formula to use all the time unless your plant is having difficulty blooming. Feed 1/4 - 1/2 tsp per gallon of water with every watering.

Use **Liquid Bloom 3-12-6** as a bloom booster to initiate and enhance blooming. Feed 1/4 - 1/2 tsp per gallon of water with every watering in place of Liquid Grow.

Supplement whichever complete nutrient formula you use with **Pro-TeKt, The Silicon Solution**, for a hardier, more disease resistant plant.

Foliage Plants (palms, ferns, etc.)

To maintain indoor and outdoor foliage plants, use our **Foliage-Pro 9-3-6** formula and our **Pro-TeKt, The Silicon Solution**.

Indoors: Feed **Foliage-Pro** and **Pro-TeKt** at a rate of 1/4 tsp each per gallon of water with every watering.

Outdoors: Feed **Foliage-Pro** and **Pro-TeKt** at a rate of 1/2 tsp each per gallon of water with every watering.

Gardens (vegetables and fruits)

Use **Liquid Grow 7-9-5** and **Pro-TeKt, The Silicon Solution**, throughout the season to produce an abundance of succulent fruits and vegetables. Feed 1 tsp per gallon of water with every watering.

Orchids

During the growing season, feed **Liquid Grow 7-9-5** at a rate of 1/2 tsp per gallon of water with each watering for healthy growth.

To promote flowering, feed **Liquid Bloom 3-12-6** at a rate of 1/2 tsp per gallon of water with each watering. Supplement year round with **Pro-TeKt, The Silicon Solution**, to promote strong stems and more numerous, longer lasting blooms.

When repotting orchids, use **Liquid Grow 7-9-5, K-L-N, The Rooting Solution**, and **Pro-TeKt, The Silicon Solution**, to promote new root growth.

Use medium or fine Dyna-Rok II as a planting mix for a superior root environment with less repotting.

For more information on specific orchids, view our [Orchid Culture](#) page.

Roses

Start the season by feeding your rose bushes **Foliage-Pro** and **Pro-TeKt** at a rate of 1 tsp each per gallon of water every 7-10 days.

To promote blooming supplement with **Mag-Pro 2-15-4** at a rate of 1 tsp per gallon of water 1-2 times per month.
